Work History

The project **Blood Bank Management System** is known to be a pilot project that is designed for the blood bank to gather blood from various sources and distribute it to the needy people who have high requirements for it.

- The Software is designed to handle the daily transaction of the blood bank and search the details when required.
- It also helps to register the details of donors, blood collection details as well as blood issued reports.

Achievements

- I have been awarded an appreciation award for the **Blood Bank Management System** project as this system got selected for working live in college campus.

Professional Summary

As a recent BCA graduate, I am eager to begin my career in the technology industry and utilize the skills and knowledge. I have gained throughout my studies. I am seeking a challenging and dynamic role where I can contribute to the development of innovative solutions and continuously learn and grow as a professional. I am able to resolve complex problems and improve user experiences.
